

## HIGH TEMPERATURE COMPOSITES , GASKETS , MILL BOARDS, TEXTILES

We supply a wide range of non asbestos, non combustible grade high temperature material for industrial applications to include Transportation – Power Switch gear, Furnace & Foundry, Forging and stamping in Aluminium and Steel industry, Glass manufacturing, Arches & Chutes, heat and fire protection, Crucible & lauder lining, furnace gasket, Cement kiln back up, boiler door lining, heat shield and many others.

Our material are manufactured to ISO quality system within EC and offer high mechanical strength, resistance to thermal shock, high temperature & good electrical properties and are cost effective

Some of our high temp refractory products include Mill boards(1000°C–1600°C ) Vacuum formed shapes and gasket material all in non asbestos and non combustible grade material for a variety of industrial applications. Contact us with your application details for a competitive offer and samples.
